

A Nest Full of Eggs (Lets-Read-and-Find-Out Science 1)

Named a Best Childrens Science Book of the Year by Science Books & Films, this classic picture book follows a full year of growth and change for robins: how the birds develop inside their eggs during the spring; how they mature into fledglings in the summer; how they learn to fly in the fall; and how they leave for warmer climates in winter only to return when spring comes around again. Now rebranded with a new cover look, this book features rich vocabulary and beautiful spreads detailing different bird habitats and feather types. Both text and artwork were vetted for accuracy by Dr. Charles Walcott, Professor Emeritus of Neurobiology and Behavior and former director of the Cornell Laboratory of Ornithology. This is a Level 1 Lets-Read-and-Find-Out, which means the book explores introductory concepts perfect for children in the primary grades and supports the Common Core Learning Standards and Next Generation Science Standards. Lets-Read-and-Find-Out is the winner of the American Association for the Advancement of Science/Subaru Science Books & Films Prize for Outstanding Science Series.
