

Curious Critters Marine

With images so stunningly life-like, so fabulously detailed, you'll believe you are swimming in the sea! Curious Critters: Marine features some of North America's most incredible marine animals captured through the award-winning photography of David FitzSimmons. The amazing photographs depict 20 common and fascinating animals of the Atlantic and Pacific Oceans, as well as the Gulf of Mexico. The subjects include a sleek black sea bass, a giant Pacific octopus, an incredible roseate spoonbill, and a one-in-a-million blue lobster, plus many more amazing creatures found along the coasts of the United States, Canada, and Mexico. Fun and educational narratives accompanying each animal highlight fascinating natural history information, and a visual index, additional curious critter facts, silhouettes showing animal sizes, and a full glossary are also included.
