

The Rule of Three: Surviving and Thriving in Competitive Markets

Name any industry and more likely than not you will find that the three strongest, most efficient companies control 70 to 90 percent of the market. Here are just a few examples: McDonalds, Burger King, and Wendys General Mills, Kellogg, and Post Nike, Adidas, and Reebok Bank of America, Chase Manhattan, and Banc One American, United, and Delta Merck, Johnson & Johnson, and Bristol-Myers Squibb Based on extensive studies of market forces, the distinguished business school strategists and corporate advisers Jagdish Sheth and Rajendra Sisodia show that natural competitive forces shape the vast majority of companies under the rule of three. This stunning new concept has powerful strategic implications for businesses large and small alike. Drawing on years of research covering hundreds of industries both local and global, The Rule of Three documents the evolution of markets into two complementary sectors -- generalists, which cater to a large, mainstream group of customers; and specialists, which satisfy the needs of customers at both the high and low ends of the market. Any company caught in the middle (the ditch) is likely to be swallowed up or destroyed. Sheth and Sisodia show how most markets resemble a shopping mall with specialty shops anchored by large stores. Drawing wisdom from these markets, The Rule of Three offers counterintuitive insights, with suggested strategies for the Big 3 players, as well as for mid-sized companies that may want to mount a challenge and for specialists striving to flourish in the shadow of industry giants. The book explains how to recognize signs of market disruptions that can result in serious reversals and upheavals for companies caught unprepared. Such disruptions include new technologies, regulatory shifts, innovations in distribution and packaging, demographic and cultural shifts, and venture capital as

well as other forms of investor funding. Years in the making and sweeping in scope, The Rule of Three provides authoritative, research-based insights into market dynamics that no business manager should be without.
